

## In-class exercise week 2

### Exercise

In the upper panel you see the distribution of 4 continuous variables (v1, v2, v3, v4). In the lower 2 panels you see boxplots and quantil-quantil plots, which you should fill in the missing labels at the positions “....” with the appropriate variable number if appropriate (v1, v2, v3, v4) or with X if the plot does not correspond to any of the 4 variables.
